Using AI on assignments

Lesson 5: know what's allowed, and say what you did.

Check the Source · 45 minutes

When you quote a book, why do you cite it?

- **Credit** to the person who wrote it
- So others **can check** it
- **Honesty** about what's yours

> The same reasons apply to AI, plus one more: AI can be wrong, so your reader needs to know **which parts to double-check**.

Three AI Use Tiers

Tier	What it means	Example
Human-Only	No AI tools. Your own thinking, your own words.	An in-class quiz
AI-Assist	AI for a step your teacher names. Check it and disclose it.	Finding books for a research project
AI-Optional	AI more freely. Still disclose and check. You're responsible for everything you turn in.	A practice activity on AI answers

> Your teacher sets the tier **for each assignment**. When in doubt, **ask**.

Your turn: tier sort

Read each assignment card.

- Which tier is it **probably**?
- **Why?**

There may not be one right answer. The reasoning is the point.

The disclosure line

AI use: I used _____ (tool) to _____ (what for) on _____ (date). I kept _____ and changed _____. I checked it by _____.

Tool, purpose

What did you use, and for what?

Kept, changed

What did you do with it?

How checked

Be specific.

An example

AI use: I used the Library Assistant to find books about volcanoes on March 3. I kept two of the books it suggested and skipped one that was about earthquakes. I checked it by finding both books on the shelf and reading their tables of contents.

Too vague

"I looked it up."

Specific

"I found it on the shelf at 551.21."

Human-Only assignment? Your line is: "AI use: none."

Your turn: write your line

Write a disclosure line for your **Lesson 3 audit**, as if it were an AI-Assist assignment.

Then swap with a partner. Does it say:

- what **tool**?
- what **for**?
- what was **kept or changed**?
- **how** it was checked?

One last question

> If the assistant sounds really sure, is the answer right?

Answer again, now with **a reason** and **a way to check**.
